## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-26 are allowed.
2. The following is an examiner's statement of reasons for allowance.

Prior art of record fails to teach or fairly suggest an apparatus and method comprising: establishing first and second phone connections between a slave test unit and a remote test unit through a digital data network, the first and second phone connections being established over first and second phone lines, respectively, each of the first and second phone lines allowing communications to and from the slave test unit over the respective phone line, and each of the first and second phone lines being connected to the digital data network so that communications transmitted between the slave test unit and the remote test unit are transmitted via packets through the digital data network and are transmitted between the digital data network and the slave test unit over the respective phone line; receiving electrical signals as communications by the slave test unit from the remote test unit via at least one of the first and second phone lines, the electrical signals comprising test commands; decoding the test commands from the electrical signals by the slave test unit and executing the test commands by the slave test unit, executing including the ability to generate test signals on either of the first or second phone lines, the test commands being received exclusively from the remote test unit, to thereby test voice signal quality of voice calls transmitted through the first and second phone lines and as packets through the digital data network as recited in independent claims 1, 11, 19 and 26 and depicted in figure 8.
